

SATYAM KUMAR DUBEY

Fullstack Developer (MERN)

Satyamdubey6367@gmail.com | +91 6261664832 | [GitHub](#) | [LinkedIn](#)

SUMMARY

Proficient Fullstack Developer with 1 years of experience in building and maintaining scalable web applications. Proficient in JavaScript, TypeScript, and modern frameworks like React, Next.js, and Node.js. Expertise in API development . Proven ability to enhance user experiences, improve application performance, and implement secure authentication systems. Strong problem-solving skills and a commitment to delivering high-quality, efficient code.

SKILLS

Technical skills

Languages: JavaScript, TypeScript, HTML, CSS

Libraries & Frameworks: NextJs, ReactJs, NodeJS, ExpressJs, Tailwind CSS, Bootstrap , MUI

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman,Vercel,Railway

Familiar with

- C,C++,Core Java,DS

EXPERIENCE

Software Developer | Bytebillion

- Developed and maintained frontend and backend APIs for a service-based web application.
- Implemented unit tests using Node.js's built-in assertion module, increasing code reliability by 20%.
- Created a fully responsive frontend using Next.js, Tailwind CSS and enhancing user experience and mobile compatibility.
- Successfully hosted and deployed the application on **Railway and vercel**, ensuring high availability and scalability.

Intern | Bytebillion

- Developed various APIs using Node.js and Express.js to perform CRUD operations, improving data management efficiency.
- Built a responsive dashboard using React.js, significantly enhancing user interaction and experience.
- Utilized Material-UI to create visually appealing React components, increasing user engagement.
- Collaborated with the development team to identify and resolve technical issues and bugs, improving overall application stability and performance.

EDUCATION

- **MCA(Master of Computer Application)**

IPS Academy & Institute of Engineering Indore Madhya Pradesh

07/2022 – 04/2024 | Indore, India

- **B.Sc. (Bachelor of Science)**

Govt . Madhav Sadashiv Golwalkar Collage Rewa Madhya Pradesh

07/2019 – 04/2022 | Rewa, India

PROJECTS

Indoricoders [Indoricoders](#) ↗

- Indoricoders is an IT coaching institute specializing in training for various tech stacks, including REACT, MERN, PYTHON, and PYTHON+DSA. The institute offers comprehensive courses designed to equip students with the skills needed for modern software development
- Developed API routes in Next.js to handle server-side requests, process data, and return responses to the client side
- Developed an authentication system using Auth.js, improving security and user management.
- Implemented a **chatbot** for Indoricoders to provide automated responses and information about various courses.
- Developed an **authentication** system using **Auth.js**, improving security and user management.
- **Tech Stack** – NextJs | JavaScript | ExpressJs | MongoDB | Auth.js | Tailwind CSS

Karomanage [Karomanage](#) ↗

- Karomanage is a portal for assisting coachings managing their work online which includes CRM, ERP and LMS all together. This is a centralized platform for coaching centers to manage their organization's activities through a single web-based portal. Using payment gateways like Razor Pay and stripe helps coaching to directly collect their payments from students and manage the data from their leads coming from different platforms.
- Developed a module similar to Google forms for generating enquiry and enabling users to easily modify the forms as per their requirements.
- Added Redux for transferring data across the application.
- Also added Microsoft Teams notifications for any error and other events in production and staging.
- Added charts for data visualization.
- **Tech Stack** – NextJs | TypeScript | NodeJs | MUI

Delivery Management system

- Order Delivery Management System to streamline order tracking, automate dispatch processes, and enhance real-time delivery status updates, improving operational efficiency and customer satisfaction.
- Implemented JWT-based authentication and authorization to ensure secure access to the system.
- Defined roles and route authorization for various user types, including User, Admin, and Driver.
- Developed Order and Driver Management systems with full CRUD operations.
- Designed and built an Admin dashboard for managing driver information, including adding, updating, and removing drivers.
- Created user-facing forms and components for order interactions, such as placing new orders, viewing order details, and updating order status.
- **Tech Stack** – ReactJs | JavaScript | NodeJs | ExpressJs | MongoDB | Postman

GroupChat App

- Developed a real-time group chat application enabling users to create accounts, join chat rooms and send messages in real time..
- Implemented secure user authentication and authorization using JWT.
- Integrated Tailwind CSS for responsive and modern UI design, ensuring a seamless user experience across devices.
- Used WebSockets to facilitate real-time communication between clients and the server.
- **Tech stack** - | React Js | Node Js | Express Js | MangoDB | Tailwind CSS | Socket io | Github
